

The ring measurement set

To print out in full size (without scaling)

Step 1: check the ring set measurement that you just printed out is full size.

To control that, the grade scale bellow must measure 5 cm (1.97 inches).

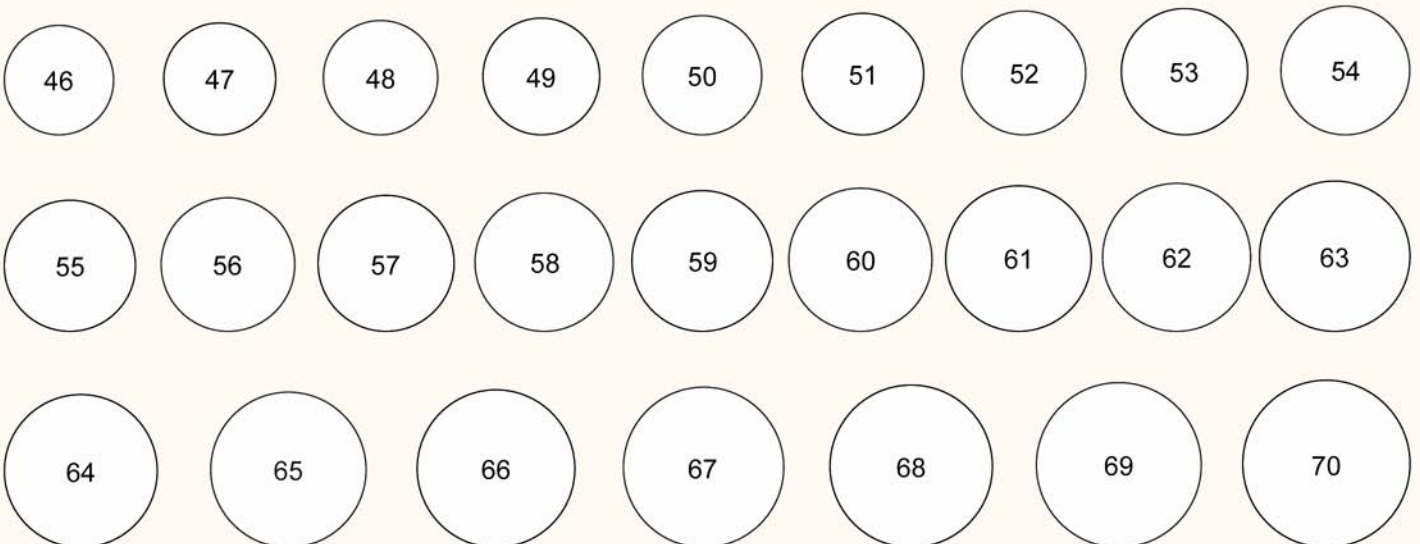

Step 2: measure your finger size.

Take a ring that suits your finger, the finger that will carry the new ring (warning, finger sizes can be different from one hand to another).

Step 3: place you ring on the circles below.

Try different sizes. When the circle's black line appears inside the ring and there is no space between the ring and the black line, it means that that number inside the circle matches your finger size.
